Expert Data Analyst specializing in HEDIS quality measures, Medicare plans, and cross-functional collaboration. Experienced in bridging data and business needs by translating complex datasets into clear, practical insights for audiences ranging from technical teams to Plan Presidents. Skilled in SQL, Python, and Excel, with a strong focus on data validation, root-cause analysis, and building dashboards that help leaders identify gaps in care and make strategic decisions.

SKILLS

Healthcare Analytics: Claims Data | Supplemental Data | Medicare Data | HEDIS | Quality Improvement | Performance Analysis
Data & Analytics Platforms: SQL | Microsoft Azure | Databricks | Python | R | Excel | Tableau
Data Analysis: Data Validation | Data Quality | Root-Cause Analysis | Quantitative Analysis | Statistical Analysis
Advanced Analytics: Multivariate Regression | Time Series Analysis | Anomaly Detection | Correlation Analysis
Reporting & Visualization: Dashboard Development | Data Visualization | Excel Reporting

EXPERIENCE

Expert Analyst, HEDIS Strategic Improvement

Emergent Holdings *11/2024 – Present*

- Synthesized complex supplemental and claims data across 5 Medicare health plan contracts, delivering audit-ready insights and accurate benchmarking for 15+ HEDIS (Healthcare Effectiveness Data and Information Set) administrative and hybrid measures.
- Leveraged Microsoft Azure, Databricks, and Python to validate and analyze large-scale datasets, investigating cross-source anomalies to improve overall data quality and reliability for downstream reporting.
- Served as the technical lead for the Inovalon HEDIS engine, overseeing vendor data ingestion, monitoring prospective and regulatory data runs, partnering with Data Engineering to resolve processing issues, and coordinating downstream outputs.
- Defined, calculated, and validated key performance metrics and conducted year-over-year analyses to identify drivers of measure performance and uncover specific gaps in care.
- Designed and implemented interactive dashboards and reporting using Excel and PowerPoint for 9+ HEDIS and Stars measures across 3 health plans, enabling leadership to monitor performance and support targeted interventions.
- Developed and validated eligibility data for quality initiatives, collaborating across technical and operational teams to resolve complex data issues and ensure accurate member identification.
- Created and presented provider organization dashboards to key stakeholders across 5 Medicare contracts, driving engagement and effectively communicating key performance drivers, success areas, and strategic growth opportunities for improvement.
- Partnered with cross-functional stakeholders and external vendors to translate business requirements into analytical solutions, delivering executive-level insights and actionable findings that supported strategic decision-making and performance improvement initiatives.

Mathematics Educator

Rochester Community Schools *08/2010 – 11/2024*

- Engineered Excel-based performance spreadsheets to track student achievement metrics and assessment outcomes, transforming raw data into actionable insights that supported targeted interventions and drove a 5% increase in overall student performance.
- Analyzed qualitative and quantitative performance data to identify areas requiring remediation, using findings to recommend curriculum adjustments and improve 200+ instructional materials used across courses and cross-functional teams.
- Defined and analyzed achievement metrics for more than 1,400 students, evaluating outcomes against learning objectives to identify performance gaps and opportunities for improvement.
- Conducted 80+ learner needs assessments involving gap analysis, research, and evaluation to identify improvement opportunities and ensure 7+ courses aligned with established curriculum standards.

EDUCATION

Master of Science in Industrial Applied Mathematics, (GPA: 3.9) | Oakland University
Bachelor of Science in Secondary Mathematics & Biology Education, *magna cum laude* | Rochester Christian University
